

Journey of Hemanth Sai

When Hemant was born, it was full of happiness, as any other parent will be, when they get their bundle of joy. But the happiness was short lived. We came to know that he is born with DS when he was 10 days old and it was shock for us. All his milestones were delayed.

Hemant loves to meet people especially kids, he loves to go for walking in the mornings. He loves music and he is good in dancing as well. He loves water and water games.

He can copy others very fast. But we do observe that he gets angry fast. He throws his tantrums when he gets angry and then it is difficult to control him.
